EDUCATION

St. Joseph's University

Brooklyn, NY

(Hons.) Bachelor of Science in Computer Science & Mathematics; Minor in Data Science

Expected May 2027

- GPA: 3.998/4.00 | Dean's List (6x)
- **Honors & Awards:** Presidential Scholar, Emerging Leader Award, SURF Recipient 2026, Faculty Technology Committee Student Rep, Sigma Iota Chi, Delta Epsilon Sigma

SKILLS

- **Programming & Core SWE:** Python (NumPy, Pandas, Scikit-learn), SQL, Java, JavaScript, R, REST APIs, OOP, Git/GitHub, Agile
- **Machine Learning AI:** Supervised/Unsupervised Learning, Feature Engineering, Model Evaluation, Predictive Modeling, NLP basics, RAG, LLM applications
- **Data Analytics Visualization:** EDA, Data Wrangling, Statistical Analysis, Hypothesis Testing, Matplotlib, Seaborn, Tableau, Power BI, Streamlit
- **Cloud, DevOps, Automation:** AWS (EC2, S3 (basic), Docker (basic), Linux, API Integration, Data Pipelines, Workflow Automation
- **Certifications:** Advanced Learning Algorithms

PROJECTS

SJNY Free Bites - Campus Food Sharing Platform | Next.js, TypeScript, Supabase, Tailwind CSS

github

- Built a full-stack campus food-sharing platform using Next.js (App Router), TypeScript, and Supabase (PostgreSQL) that enables real-time posting and discovery of surplus campus food to reduce waste and improve distribution efficiency.
- Implemented secure, production-style backend architecture with Supabase Auth (domain-restricted access), Row Level Security (RLS), and a centralized data layer, along with auto-expiring posts and state management for time-sensitive listings.

Music Recommender with AI Feedback Loop | Python, NumPy, Streamlit, Groq (LLaMA 3.3), RAG

github

- Built a scalable music recommender on a 72k-song dataset using cosine similarity retrieval and weighted ranking to generate personalized recommendations.
- Designed an LLM-powered feedback loop (LLaMA 3.3 via Groq) within a RAG pipeline, improving user satisfaction from 75 across iterations and validating performance with 37 tests.

1LLM2RuleThemAll | PyTorch, NumPy, Tiktoken, Transformers

github

- Architected and pre-trained a GPT transformer from scratch using PyTorch, implementing multi-head self-attention, AdamW optimization, and custom validation loops with automated checkpointing.
- Engineered a high-throughput NLP data pipeline utilizing Tiktoken to tokenize text corpora into overlapping sequential chunks for custom PyTorch Datasets and DataLoaders.

Community-Based Fact-Checking: Replication & Extension | R, tidyverse, ggplot2

github

- Developed automated Linux Bash pipelines and R workflows (tidyverse, ggplot2) to preprocess a dataset of 11,802 notes and 52,981 ratings, reproducing 10+ analytical figures from the ICWSM Birdwatch study.
- Conducted advanced analytics using R and machine learning, performing exploratory data analysis (EDA), visualization, regression modeling, and cross-validation to evaluate model performance.

EXPERIENCE

Microsoft

Manhattan, NY

Data Science Research Intern

May 2025 – July 2025

- Contributed to applied statistics research by reconstructing analytical methods from published studies, extending experiments, and rigorously evaluating the statistical significance and robustness of results.
- Examined large datasets to confirm research outcomes, surface methodological gaps, and present insights that enhanced reproducibility and evidence-based decision-making.

Break Through Tech @Cornell Tech

Manhattan, NY

Machine Learning Fellow

May 2026 – Present

- Selected for a competitive AI/ML fellowship focused on applied machine learning, statistical modeling, and industry-aligned technical training.
- Built and evaluated machine learning models using Python, including data preprocessing, feature engineering, and performance analysis to solve real-world data-driven problems.

Leapfrog Technology

Dillibazar, Kathmandu

Software Engineering Intern

Mar 2023 – June 2023

- Designed, developed, tested, and deployed 3+ web application features, integrated RESTful APIs, resolved production issues, and optimized application performance while collaborating with engineers in an Agile software development environment.

LEADERSHIP AND AFFILIATIONS

- **Codepath** | AI Engineering | AI Open Source Capstone
- **SJNY Computer Club** | Treasurer | Brooklyn

Sep 2025 – Present

March 2026 – Present
